

Motivational essay

"The past cannot be changed. The future is yet in our power." (Unknown)

To Dean _____ (name)

My name is _____ (name of the student) and I am a graduate of _____ (name of high school) from ____ City, ____ County, June - July 2017 session.

Since childhood, I have always liked solving issues or getting involved in various situations, yet I would never give up and what seemed impossible for someone for me it was just another touchstone. Now, finding myself at that crucial moment of taking a good decision to draw my life`s path, I sincerely admit that choosing the **Faculty of Political Science** will be my most appropriate option. I believe this faculty will suit me because of its interdisciplinary domain; it is not just politics, which I am interested in. It is about understanding people`s needs, their problems. I am aware of the fact that we all live in a community and how could we do it well, if not with proper communication. This leads to one of my key strengths I am already good at, but I still would like to improve. I am a good and optimistic communicator having the power of persuasion, I am an energetic and confident person, the type of whom people can rely on.

Nowadays people no longer believe in politicians and most of the time they have strong reasons and evidence to do that. It is hard to please everybody, you have to possess strong knowledge from different domains and this is why I would like to attend the courses of this faculty. Because I will have the opportunity to learn how to reach my goals, my expectations, which may be common and simple for anyone else, selfish, perhaps, in the end, but major for me: a good and normal life for the world, which consequently leads to a better life for me. How should I get to it, if not by a proper personal development, by learning how to successfully apply projects I may have already thought about.

To support the above, during high school I was involved in the school Olympics (at Romanian and English), along with some teachers I took part in several Erasmus projects, volunteering projects too. Although I chose a high school focusing on theoretical studies on humanities, I passed the ECDL exams, level____ Good knowledge of foreign languages and good computer skills are nowadays imperative.

Coming to the University on "Doors Open" Day, I listened to people asking questions about the Faculty of Political Science. What most impressed me was that no one could give a sustainable answer to the question: "*What will I become after I have graduated?*" I found myself in a strange position to admit that was what I was looking for: a faculty with lots of possibilities, whose courses lay on various domains of applicability.

Hoping you will find my statement one to be worth taking into account, I should thank you for your time and consideration.
